

Pediatric and Adolescent Health Partners **Vaccination Policy**

Pediatric and Adolescent Health Partners has developed a vaccination policy intended to ensure the health and safety of our patients. We strongly recommend that all children maintain an up-to-date immunization record as recommended by major health organizations. If you would like to have an alternative vaccination schedule for your child, we will work with you in order to meet your needs with the following restrictions.

Pediatric and Adolescent Health Partners requires the following:

- All children must have up to date immunizations by 24 months or 2 years of age
- A child's first vaccination must occur by 8 weeks or 2 months of age
- All children are required to have at least 3 DTaP (Diphtheria, Tetanus, Acellular Pertussis) vaccinations, 3 Hib (Haemophilus Influenzae) vaccines, and 3 Prevnar (Pneumococcal) vaccinations by 6 months of age.

We feel that the above conditions best ensure the health and safety of our children. Thank you for your willingness to adhere to the above vaccination policy and please feel free to ask any questions.
